Getting Started

It's easy to get started creating your website. Knowing some of the basics will help.

What is a Content Management System?

A content management system is software that allows you to create and manage webpages easily by separating the creation of your content from the mechanics required to present it on the web.

In this site, the content is stored in a database. The look and feel are created by a template. The Joomla! software brings together the template and the content to create web pages.

Site and Administrator

Your site actually has two separate parts. The front end (also called the front end) is what visitors to your site will see. The administrator (also called the back end) is only used by people managing your site. You can access the administrator by clicking the "Site Administrator" link on the "User Menu" menu (visible once you login) or by adding administrator to the end of your domain name.

Log in to the administrator using the username and password created during the installation of Joomla.

Creating an article

Once you are logged-in, a new menu will be visible. To create a new article, click on the "Submit Article" link on that menu.

The new article interface gives you a lot of options, but all you need to do is add a title and put something in the content area. To make it easy to find, set the state to published.

You can edit an existing article by clicking on the edit icon (this only displays
